

2010 National Plumbing Code Explanatory Drawings

(Montreal, May 29th 2012) In light of the success of its illustrated version of the Quebec Plumbing Code, the Corporation of Master Pipe-Mechanics of Québec (CMMTQ) offers its expertise to Canadian plumbing contractors and industry professionals with the publication of the *2010 National Plumbing Code Explanatory Drawings*.

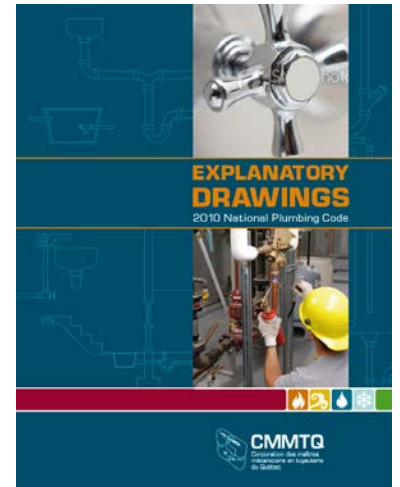

The clear and simple illustrations in this guide will help users visualize and understand the obligations contained in the key articles of the 2010 edition of the National Plumbing Code, as well as understand the additional explanations related to plumbing systems described in the 2010 edition of the National Building Code.

Since some of the installation requirements included in these codes may be included in conditions described through several paragraphs and subparagraphs, the CMMTQ believes that representing the bulk of these conditions in a simple drawing substantially simplifies their understanding and helps meet the purpose of these codes. The guide also provides examples of practices which should be avoided.

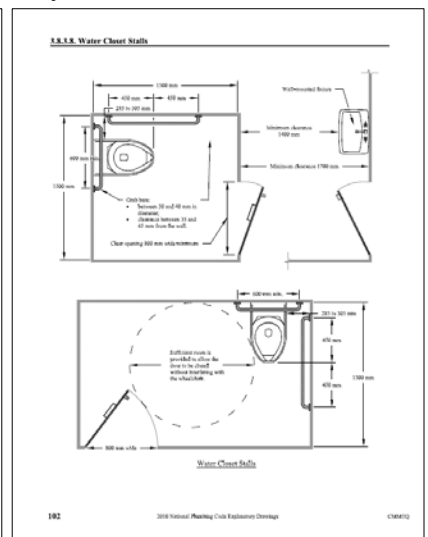

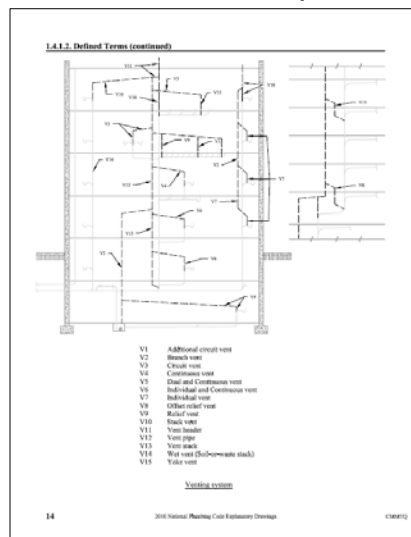

These illustrations represent solely the CMMTQ's Technical Services interpretation of these codes' articles. Their intent is only to graphically depict the content of the articles and in no circumstances do they replace the official documents published by the National Research Council of Canada (NRCC) and adopted by regulatory authorities.

This document should always be consulted along with the official codes of the NRCC.

To order a copy of the **2010 National Plumbing Code Explanatory Drawings**, please visit our web site at www.cmmtq.org and click on "Catalogue", and then "Manuels, guides et publications", or contact us at 1 800 465-2668 / 514 382-2668.

Size: 8 1/2 x 11 in
109 pages, more than 400 illustrations
Non-member price: 45 \$

About the CMMTQ

Created in 1949, the Corporation of Master Pipe-Mechanics of Québec (CMMTQ) is mandated to enforce the application of the Master Pipe-Mechanics Act and to ensure its members' occupational qualification. The Corporation includes 2,400 contractors specialized in plumbing and heating. It provides a framework for them and supports them by offering various services which help them reach and maintain the highest standards in excellence as building services contractors in the province of Quebec.
