- Federal Election 2015 News Flash -

Tom Mulcair and NDP Support Prompt Payment Legislation !!

"Tom Mulcair and the New Democratic Party favours prompt payment legislation as a means of correcting the unfair payment squeeze the contractors all too often find themselves in".

This was the "official" message we received yesterday (Wednesday, October 14, 2015) from NDP party headquarters. This is proof that your efforts are paying off. MCA Canada members have gone to the www.promptpayment.ca website and have sent letters to local candidates in support of federal prompt payment legislation. There is also background information available on the website (click the link: "*Delayed Payment: Why Is It a Problem?*").

With only days to go before the Federal Election, we would encourage those who have not had a chance to write their local candidates through www.promptpayment.ca to do so..... now.

We are currently trying to get the other party leaders to issue similar statements of support and, with your help, we can succeed.

Once again, please encourage your coworkers, friends and families to visit the website to get more information and to send a letter of support. Prompt payment is on the federal agenda. Let's make sure it stays! For sharing on Facebook and twitter, we have drafted the post below that you can share from your personal or business accounts:

"Delayed payments hurt businesses and families. We are calling on all parties to make prompt payment legislation a priority in this election! www.promptpayment.ca #promptpayment".

MCA Canada and the National Trade Contractors Coalition of Canada are well-positioned to work with all parties following the campaign. Watch for post-election updates.

Richard McKeagan
MCA Canada President
